

ANDALUCÍA EN LA HISTORIA

Nº 84: Slavery (XV to XVII centuries)

ABSTRACT

Historiography of slavery in the Castilian Crown is today a consolidated field of studies, with an enormous scientific production. However, the story of slavery remains largely unknown outside of academic circles. The new issue of the magazine 'Andalucía en la Historia', coordinated by the researcher Eduardo Corona Pérez, professor in the Seville University, gathers eleven specialists who address different faces of this reality: jurisprudence, archives, origin, work, family, markets, freedom and litigation among other topics.
