

ANDALUCÍA EN LA HISTORIA

Nº73: Andalusia, a gateway to Asia

ABSTRACT

500 years ago, the Magellan-Elcano Expedition discovered the Southern Passage, which opened up a new world of possibilities in Asia and Oceania. Andalusia was involved in these events. It played a crucial role as a gateway to Asia, in addition to its centrality in the Hispanic and European world during Modern History. Plenty of artistic samples confirm these rich exchanges with the East, and also an extended human legacy, whose projection continues in our days.
